

Curriculum Forum Day 2023: Synopsis of Science Parents' Workshops

I) P3 / P4 Parents' Workshop:

Have you wondered how you can help support your child's learning and application of science concepts? Join our workshop and discover how children acquire and develop the various process skills through hands-on activities. Get some tips from our experienced teachers on how you can coach your child in understanding the scientific method and tackling open-ended questions through CER (Claim – Evidence – Reasoning) strategy. These skills are necessary for your child to understand open-ended questions and apply the appropriate Science concepts. At the end of the workshop, you will be able to better support your child's learning in the teaching and learning of science.

II) P5 / P6 Parents' Workshop:

Have you ever wondered how can you help your child tackle some of the Physical Science topics and questions? Join our workshop and discover how children acquire and develop the various process skills through hands-on activities. Explore ways to develop your child's interest in the Science subject. Get some tips from our experienced teachers on how you can coach your child in tackling open-ended questions through the CER (Claim-Evidence-Reasoning) strategy. Learn the skills to equip your child with the necessary skills required to understand open-ended questions and to accurately construct scientific explanations when answering them. At the end of this workshop, you will have a better understanding of the teaching and learning of Science and can better support your child's learning.
